## Work Experience

### UX Research Associate at Facebook [June, 2017 – Current]

Currently working in Ads Measurement. My main responsibility is to represent the voice of the advertiser to internal teams by conducting qualitative research. This involves planning, recruitment, conducting research, analysis, and reporting. Frequently used methods: remote interviews and usability tests.

### User Research Assistant at Anki [March, 2016 – May, 2016 – Freelance]

Assisted in the execution of usability and marketing tests. Setup included iPad and Wirecast. Reported findings at informal and formal meetings. Intake and outtake of participants. Video editing and creation of deliverables pointing out issues and suggestions. Product: Cozmo.

### Jr. User Researcher Assistant at Activision [March, 2015 – July, 2015 - Contract]

Assisted with the execution of a variety of tests under the direction of a supervisor, including setup, intake/outtake of participants, recording/reporting of the players' experiences, and other research related activities including recruitment. Games: Guitar Hero Live, Skylanders Superchargers, and CoD Black Ops 3.

### Search Engine Optimizer at Submit Express [June, 2013 – February, 2015]

Responsibilities included maintaining an open channel of communication with 35+ clients and increasing the search engine visibility of their businesses by implementing offsite and onsite marketing plans. The analysis of data from Webmaster tools and Google Analytics for SEO and UX improvements.

## Academic Projects

2008 - What gamers really do: Multi-tasking while playing online computer games. Designed a case study and recruited participants. Followed the contextual inquiry method by playing Maple Story Global and conducting in-game interviews. Collated data and presented findings.

2007 - Research study of an Online Community/ MMORPG. Evaluated aspects of the game based on online community principles, recruited participants and conducted phone interviews with actual players. Also created personas based on the analysis and Bartle's (MUD) players. Designed a prototype (wireframe) and presented findings.
